

General Data Protection Regulation Readiness Assessment

Assessment Business Benefits

New Signature, has teamed up with Aprose Risk, a leading cyber security and data privacy practice, to offer you a holistic approach to readying yourself for the introduction of GDPR.

Together, our collective expertise provides you with a wealth of cyber security, data privacy and best practice expertise combined with industry leading Microsoft cloud professionals to quickly identify how you measure up to the new regulations and what you need to do to.

GDPR Explained

Understand how GDPR affects your business

Executive Focus

Engage with your executive to establish your compliance position

Governance

Assess existing data privacy and cyber security controls

Technology

Address 'Right to be Forgotten', 'Restriction of Processing'

Business Processes

Consent, Transparency, Data Subject Rights, Lawfulness of Processing, Accountability, Notification of Data Breaches .

General Data Protection Regulation (GDPR) Readiness Assessment

Phase 1

The New Signature GDPR Readiness Assessment is a programmatic approach to discover, assess, identify and address your business risk and governance obligations in line with GDPR requirements which will incorporate cyber security best practice such as ISO 27001.

Phase 2

The second phase is designed to bring together the output from phase 1 and set out how all the various pieces fit together to provide a solution to the GDPR challenges which can be implemented 'at pace'. This elegant option is supported by an agile cloud technology architecture which can be easily integrated with your existing technology platform.

General Data Protection Regulation (GDPR) Readiness Assessment

	ENVISIONING & DISCOVERY	We will run stakeholder workshops to analyse and capture your existing capabilities and the strengths, weaknesses of your current position.
	ASSESS & PLAN	We'll demonstrate practical compliance with GDPR requirements, e.g. Explicit Consent, Establishing the Basis for Lawful Processing, Privacy Impact Assessments and the balance between the Data Subject against the Data Controller.
	ROADMAP & ADOPTION	Define what the roadmap to GDPR compliance looks like for your business. The new model will leverage Microsoft Cloud services to address the key technological challenges posed by GDPR
	NEW WAYS OF WORKING	The roadmap will detail new ways of working which align with your business strategy and set out the new capabilities and timeline required to demonstrate your GDPR obligations are met.
	CLOUD TECHNOLOGY ENABLEMENT	We will set out how the underpinning Cloud based architecture services interact at key 'compliance touch points' to make the retrieval of GDPR regulatory evidence easy to gather.
